

Deck Width: 5'

Length: 10'

GVWR: 10,400 lbs

Empty Weight: 3,120 lbs

Payload Capacity: 4.05 yd<sup>3</sup>

Sides: 22" Fully Formed Sides, 12-GA, Top Rail Measuring 2.75 x 3.25"

Floor: 11 Gauge, Smooth Flooring

Frame: Mainframe 6" Ultra Strong I Beam Frame

Fenders: Diamond Plate

Door: **CoreLatch™** Locking System

Coupler Height: 2-5/16" Adjustable, 6 Hole

Tires: ST225/75 R15 LRE

Axles: 5.2K Tandem Axles, Includes Electric Brakes

In dump trailers, scissor lifts provide powerful, stable lifting for heavy loads, ensuring smooth and efficient dumping operations. Their design allows for balanced weight distribution, enhancing safety and reliability during use.

A remote control for dump trucks enhances safety, boosts efficiency, reduces labor costs, and increases precision. It allows operators to work from a distance, improves control, and saves time, leading to higher productivity on job sites.

The safety breakaway system with cable ensures your dump trailer stops safely if it disconnects from the towing vehicle, preventing accidents and keeping your load secure.

Locking ramps and doors with zerks on a dump trailer enhances security and simplifies maintenance, ensuring durability and reliable performance.
